**SS (Super Sports) 5-speed Close Ratio Transmission Kit** (Shift pattern is return-type.)

■ With this "Super Sport 5-speed Close Ratio Transmission", you can use the power band from bottom to top effectively without stress. Stock transmission is not good enough-especially for the upgraded engine - to use the power band properly and cannot deliver full potential of the engine.

If you equip with this "SS 5-speed Close Ratio Transmission", you will be able to use the proper power band without stress in any riding conditions, streets, turns or races. It will allow the full potential of the customized engine.

■ The included shift fork treated the special coating on the surface to increase the durability.

■ Gaskets for crankcase and R crankcase cover which are necessary to install this Transmission Kit are included.

(Our SS 5-speed Close Ratio Transmission Kit For Monkey/Gorilla includes two types of crankcase gasket for 6V and 12V.)

※ As 6V Monkey and Gorilla (Z50J-1300017~1805927) are A-type kick starter spindle vehicles, you need to change to B-type kick starter spindles. ■ Kick Starter Spindle Kit(B-type) (02-04-0011)

■ Our SS 5-speed Close Ratio Transmission Kit comes in four different gear ratios, so you can choose one according to your purpose of riding.

- Street 1st : 2.357 2nd : 1.764 3rd : 1.400 4th : 1.136 5th : 0.958
- Super street 1st : 2.357 2nd : 1.764 3rd : 1.400 4th : 1.136 5th : 1.000
- S-Touring 1st : 2.357 2nd : 1.611 3rd : 1.190 4th : 0.958 5th : 0.807
- Super close ratio 1st : 2.357 2nd : 1.526 3rd : 1.286 4th : 1.130 5th : 1.000

**■ 5-speed close ratio Transmission Kit for 6V / 12V Monkey • Gorilla • Monkey BAJA**

Applicable model : 6V Monkey • Gorilla (Z50J-1300017~1805927)

※ As 6V Monkey and Gorilla are A-type kick starter spindle vehicles, you need to change to B-type kick starter spindles.

: 12V Monkey (Z50J-2000001~/AB27-1000001~1899999)

※ 12V FI Monkey is NOT applicable. Choose our transmission kit for exclusive use with FI models.
