## TAF 5-speed Close Ratio Transmission Kit (Return type)

The durability and operability have increased, while the advantages of our current close ratio transmission have been maintained. The shift fork is newly applied the special coating. The maneuver of the shift fork became quick and short, so that the gear could be designed thicker. These facts increased the durability. Also the dog of gear has the conventional tapered shape.

That makes the shifting smoother and prevents from mis gear shift.

- Super Street gear ratio 1st:2.357 2nd:1.764 3rd:1.400 4th:1.136 5th:1.000
