

Hyper C.D.I. for Super Cub 50 and Little Cub (carburetor model)

- Hyper C.D.I. for Super Cub 50 and Little Cub (carburetor model) that comes in a case with a sleek black anodized finish. Changes the ignition timing by simply replacing the stock C.D.I. with this component and fastening the bolt. This product achieves superior compatibility with our bore up kit for even better engine performance. Furthermore, this component disables the rev limiter on bikes (if stock limiters equipped)
- Two types available ,with starter motor and no starter motor model.
For the Cub, we do not distinguish whether or not a starter motor is equipped based on the Frame No's.
 - Hyper C.D.I. 05-03-0006 (for starter motor w/4 sp limiter equipped C.D.I.) 6 pin copular and 6 lines
 - Hyper C.D.I. 05-03-0007 (4 sp limiter equipped C.D.I.) 6 pin copular and 5 lines.
- ★ For compatible vehicles, only the Frame No. for 1991 and later models are indicated.
This component can be used on earlier models as well if equipped C.D.I. ignition but in some cases compatibility cannot be confirmed based solely on whether or not the starter motor is installed. Check line of wiring.
