

## New Billet aluminum rear shock unit.

■Rear shock absorber made with an aluminum body for a luxurious feel. Using an oil dumper structure, this component achieves pleasant riding performance in a wide range of fields. With this product, spring preload can be adjusted freely over a 30mm range. Furthermore, we prevent damage to the screw component through our use of a resin-coated bolt to prevent loosening of the spring adjustment nut.

Stock swing arm, Takegawa aluminum swing arm and chain guards can be install with this kit (Super cub/ Little cub)

★You can also install for Monkey (16cm extend swing arm only) with included 10mm collar.

• Free length 325mm (same as stock) • Spring adjustment: 30mm • Spring color: Red
