■Optional parts for Monkey (FI)

■Battery Relocation Kit for Monkey (FI)

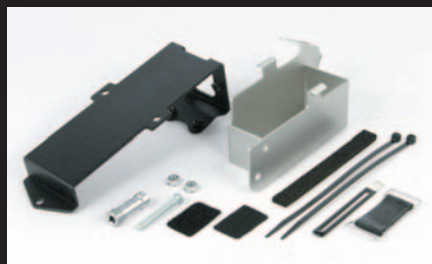

Move the battery, battery case, regulator and misc. parts located under the seat of FI Monkey to the left side cover section. This kit makes it possible to mount our TL seat exclusively for FI with our up style exhaust. (With the conventional battery relocation kit, the battery is to be moved to the right side and up style exhaust system cannot be used.)

This kit makes it possible to mount the TL seat and our oil catch tank kit together with our down type exhaust.

The stock left side cover can be used with a small modification. TAKEGAWA's original Left side cover is also available.

■TAKEGAWA's Left side cover : Selectable White, Black, Carbon print, from Plating print

※To use the stock air cleaner box is required for processing parts of the TAKEGAWA's Left side cover.
