

■ S-Stage Bore Up Kit 164cc / Hyper S-Stage Bore Up Kit 164cc For D-TRACKER 125 / KLX125 (2010 model)

■ D-TRACKER125/KLX125 dedicated kits added to the "S Stage Series" offering the enjoyment of a tuned engine while maintaining the stock cylinder head and crank shaft. The displacement of 164cc when this product is attached, providing a significant power boost from the stock engine. Steel sleeved aluminum cylinder has great heat transfer.

Pistons are manufactured using light-weight aluminum and the top surface is finished with a precision CNC coating. The camshaft surface is finished with a special coating that provides superior anti-wear properties.

There are two types on this kit, one with factory modified generator cover and other without generator cover.

(you will modify your stock generator cover yourself)

• 62mm(bore) × 54.4mm(stroke) Displacement:164cc Compression ratio:11.6 : 1

※Need FI CON (05-04-0004) with this S-stage bore up kit. Always use with Takegawa FI CON(use other manufacture's FI controllers may not work Or damaged your engine.) Furthermore, installation of the pickup coil bracket and generator cover included with the S Stage bore up kit.

■ We also offer the "Hyper S Stage Bore Up Kit" in which the FI CON is included as a set with the S Stage bore up kit. This is an all-in-one package that includes all parts required for road operation.

■ About our FI CON for D-TRACKER 125 / KLX125

This FI CON designed specially for our bore up kit. Based on the signal output from the original ECU and the fuel adjustment map stored in the controller, fuel injection volume adjustments are made in real time to allow our original engine parts to achieve their intended performance levels Settings are easily configured via the controller rotary switch and settings can be made to fit the type of engine parts used. Achieves a level of fuel injection that exceeds the maximum injection volume possible with the original computer.

※No rev limiter function, ※For 2010 model only, (Not for 2011 model)
