## Optional Parts

- This bulb can be used with round type S and round type M turn signals. It has been made to approximately same size as G18 bulbs so that you do not need to worry about interfering to a lens.  
This product is an LED bulb of the orange emission of light, but please use this even when using an orange colored lens.
- Bulb specification : G18 / BA15S
- ※ Always use with our relay (05-08-0073) with this kit.
- ★ Since the stock blinker of Monkey and Gorilla does not have good reflection on the inside of the blinker body, we recommend installing our Z inner reflector kit (05-08-0072) , or blaze blinker kit at the same time.

Name	Umber LED bulb / G18 (2 pcs)
Applicable model	Universal
Item number	05-08-0074

It is a wide range specification that is adoptable for a wide range of wattage. You can blink it on the appropriate speed (85c/m) from low wattage (from 2W) to high wattage (up to 60W). It is adoptable for different wattage combinations such as Front and rear: LED, front and rear incandescent bulb, front incandescent bulb, and rear: LED. This form is adoptable to genuine parts of many motorcycles. The cushion rubber has both the parallel holes and straight holes, so you can use it conveniently for customized bikes.  
Specification: Unit size: 35mm×35mm×24mm, 2pin, Bracket size W:17mm/15mm deep  
※ No compatible with Battery Less or position lighted equipped vehicles relay.  
※ No for Battery Less quipped vehicles.
