

Billet aluminum oil level gauge

PCX

■ A billet aluminum oil level gauge can be dressed up only to exchange with stock one. The three-dimensional design with the strong presence is the shape that is easy to turn at a fingertip at even the deep place. We offer four kinds of vivid alumite colors, silver, black, blue, and red. It is very suitable to spice up around the engine. There is a laser marking, "Takegawa piston mark", in the central part. Slits are provided at the gauge part as to be easy to confirm the oil level.
