

Compact Oil Cooler Kit (3 Row & 4 Row) DAX 50

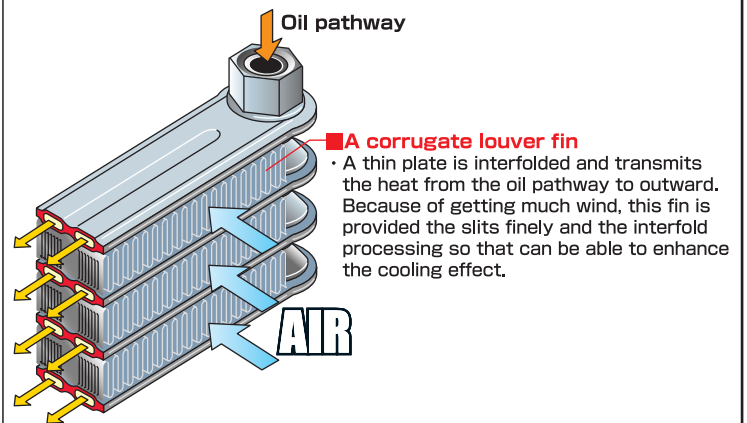

■ Compact cool AW kit, which can connect with an oil cooler output such as DAX 50 special clutch cover 02-01-0031 or cover included in special clutch kits, 02-01-0032 and 02-01-0033. It is most suitable for the hot season and the oil cooling of the bore up engine. Oil cooler body is adopted the compact cool AW which fits to 4 MINI. An oil cooler plate and an oil cooler guard are included as standard equipment.

Detail of Compact cool

We adopted the standard type oil pathway and a corrugate louver fin. As a mounting part of the stay is united with an oil cooler plate, it is possible to make upside down the output position only by reversing the main body of the cooler. (See below.)

As there is an installation stay part at the oil cooler guard, it is possible to make upside down only by reversing the main body of the cooler.
