

■S-Stage Bore Up Kit 170cc / Hyper S-Stage Bore Up Kit 170cc

■FI CON2(Injection controller)

For PCX(JF28-1000001~1099999)

■S-Stage Bore Up Kit 170cc / Hyper S-Stage Bore Up Kit 170cc

Become a strong torque and powerful output performance. You can feel the powerful acceleration. The S-Stage contains a ceramic plated aluminum cylinder with excellent durability, air tightness, heat dissipation. The set includes sports camshaft, piston kit, gasket set, can maximize the performance of the engine. By the 11.2:1 compression ratio of the piston, can use the regular gasoline.

※If you are installing the S stage bore up kit, our FI CON2 should be installed simultaneously .

Hyper S-Stage Bore Up Kit 170cc

The Hyper S-Stage includes S-Stage Bore up kit 170cc, FI CON2(Injection controller), high-speed pulley, and the clutch center spring.

■FI CON2(Injection controller)

By switching the rotary switch on the body, the user can change the settings easily.

Have various built-in maps for your custom bike with our parts.

In addition, built-in correction map also has the ability to fine-tune.

※Without rev limiter cut function.

※The operation check of the FI CON2 is confirmed with only the PCX(JF28-1000001~1099999) released in Japan.

※Can not be installed in New PCX (JF28-1100001 ~), PCX150

※Don't install the HID kit simultaneously. It is maybe the reason for the operation failure.

※Don't install other's Ignition device simultaneously. It would cause malfunction or product failure.
