

## ■Enhanced aluminum forging brake arm kit (For Front) For CROSS CUB / Super Cub 110 PRO / Super Cub50 PRO

By extending the length, you can make a brake with a lighter touch than using stock arm.

Length of the brake arm at the time of mounting: 27mm extension from the stock one.

Through the forged aluminum alloy, increase the strength and the weight is lighter.

Weight of the brake arm: 30% weight reduction from the stock one.

The treatment of the surface is buffing.

※Only for the front drum brake and cannot be used with the rear drum brake.
