

■ Stainless grab bar (Standard/ With backrest) For FORZA Si

At the rough road and acceleration and deceleration, it will support the tandem rider.
By using the 4 bolt holes disposed below the genuine cover, can be fixed firmly.
You can choose from two types, "with backrest" or "Standard(without backrest)".
With our backrest kit, standard kit can be upgraded to the with backrest type.
※Necessary to make some holes to genuine cover to install a grab bar.
