

■Slipper clutch kit

Ninja250 / Ninaj 250R / Z250

At the downshifting rapidly, the slipper clutch will slip the clutch for relieving the back torque. It is possible to reduce the burden on the transmission, hopping of rear tire by the engine brake.

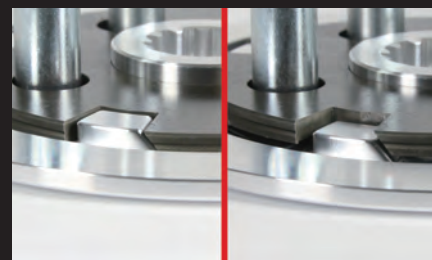

※If there are damage or wear in your friction disc, clutch plate or springs, please purchase the 02-01-0108.(with disk plate)
