

■ Sprocket guard plate

GROM / MSX125

For GROM/MSX125, in order to prevent damage to the parts around the drive chain, there is a guard plate in the genuine front sprocket cover.

When mounting our 16T/17T drive sprocket, because it will interfere with the genuine guard plate, this sprocket guard plate is required.

Stock drive sprocket is 15T.

※When removing the genuine sprocket guard plate, you will need a simple processing.

■ Steel drive sprocket

There are 6 kinds of drive sprocket for your choice. 12T, 13T, 14T, 15T, 16T, and 17T.

Shape of the sprocket: Standard type 12T, 13T, 14T; Racing type 15T, 16T, 17T

※When installing the 16T / 17T drive sprocket to GROM/MSX125, it is necessary to wear our sprocket guard plate (02-05-0001) simultaneously.

※If the teeth number of the sprocket you replaced is different from the genuine one, there should be an error in the display of genuine speedometer.

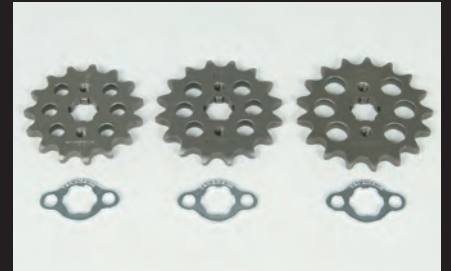

For correcting the error, our speed sensor kit (coming soon) for genuine speedometer is required.

Sprocket guard plate

Standard type: 12T, 13T, 14T

Racing type: 15T, 16T, 17T

Name	Sprocket guard plate
Applicable model	GROM(JC61-1000001~) MSX125(MLHJC618_D5000001~)
Item number	02-05-0001
Price	¥1,400

Name	Steel drive sprocket (Standard type)
Applicable model	GROM(JC61-1000001~) MSX125(MLHJC618_D5000001~)
Item number	12T 02-05-01 ¥900
Price	13T 02-05-02 ¥900
	14T 02-05-03 ¥900

Name	Steel drive sprocket (Racing type)
Applicable model	GROM(JC61-1000001~) MSX125(MLHJC618_D5000001~)
Item number	15T 02-05-041 ¥1,200
Price	16T 02-05-051 ¥1,200
	17T 02-05-021 ¥1,400
