

■Head Light Controller

Lead 125

By installing this product, can be turn on the headlights of the lead 125 only during the engine is running.

It allows you to reduce power consumption and to reduce the burden on the battery.

You can use it safely because only controlling the lighting of the headlight, and tail lamp and position lamp will not go off. Just connect with coupler. Not required to modify the wiring.

※High beam cannot be controlled. If the switch is at the high beam position, even in idling stop mode, headlight will not turn off.

※It is not compatible with the HID headlight or LED headlight.

※It is not confirmed that the Headlight Controller is compatible with Lead 125 (Vietnam Model) or not.
