■R-Stage Bore Up Kit

■R-Stage head

Large port diameter IN : 24mm / EX: 20mm

In addition, adopt the port shape that allows it to flow smoothly intake and exhaust gas more.

Large valve diameter IN:26mm/EX:22.5mm

Adopt the irregular pitch (two-stage pitch) single valve spring. It makes difficult to cause the surging at high rotation.

■Piston For better break-in, molybdenum coating is applied to the piston skirt.

■Cylinder

Adopt the all-aluminum ceramic plated cylinder.

It is a cylinder with excellent durability, air-tightness, heat dissipation.

In addition, our oil cooler kit can be mounted to the cylinder easily.

■FI CON PLUS (correspond to the big throttle body)

FI CON PLUS has a three-dimensional fuel map inside.

Based on signals from various sensors, FI CON PLUS provides fast operation.

It is possible to provide an optimum fuel injection to match the engine situation.

In addition, the ignition system circuit is built-in; ignition timing has also been optimized for the R-stage.

It is possible to use up to high rpm rev limit that exceeds the stock ECU.

※Must comply to use a specified number of rotation. ※Do not install with the HID kit simultaneously.

※Please do not be installed simultaneously ignition device of other companies.

※FI CON PLUS will only correspond combination of our parts. It is not compatible with the parts of other companies.

■Big throttle body kit

It is a big throttle body kit that has been developed for our R-stage cylinder head.

By mounting this product, you can pull out the output of the R-stage cylinder head and enjoy a high output performance.

If you have already installed our FI CON PLUS, and you'd like to install our big throttle body kit, it is necessary to update the program. The fee of updating the program: 12-05-0007 ¥5,000 **※Additional postage is required.**
