

■Front caliper bracket kit (For Brembo 4P caliper)

Correspond to GROM/MSX125 stock front disc rotor, and our floating disk rotor.

It's a mounting bracket kit for installing the Brembo 4P caliper into stock front disc rotor or our floating disk rotor. Can exert a strong braking power and enhance the custom image.

The bracket is anodized billet.

※As we don't sell the Brembo 4P caliper (20-5165-68), you need to purchase it separately.

■It is compatible with stock front brake hose or our front brake mesh hose.

※It is required to change the banjo bolt. See below.

■with the stock front brake hose: Banjo bolt (M10 x P1.0) (with 2pcs sealing washer) [00-07-0079](#) ¥1,500

■with our front brake hose mesh: Adapter (M10 x P1.0) (with a sealing washer) [00-07-0075](#) ¥900

Front caliper bracket kit

Floating disk rotor
