

■Rear caliper bracket kit (for breombo 2P caliper) For GROM/MSX125 stock rear disk rotor

It's a mounting bracket kit for installing the breombo 2P caliper into stock rear disk rotor. By mounting the breombo caliper, it will be able to get a strong braking power, and enhance the custom image. Speed sensor mounting portion is provided. Bracket is anodized billet aluminum.

※It is necessary to purchase the breombo 2Pcaliper (20-6951) separately. We do not sell it.

■It corresponds to our rear brake mesh hose and stock rear brake hose.

※It is necessary to change the banjo bolt. Please check the following.

■banjo bolt (M10 × P1.0) (with 2pcs sealing washer) [00-07-0079](#) ¥1,500
