

## LED Headlight kit

**For 12V vehicles Universal**

It is our original LED headlight kit that is optimized for motorcycles.

■ We adopted the CREE's high-performance LED chips.

By setting the color temperature 5000K, ensures visibility practical at such bad weather conditions.

■ Built-in small electric fan as countermeasures against heat.

Can use to effectively cool the LED chip.

■ Can be switched the irradiation range, Low / High.

By the LED arrangement that has been devised to be close to the position of HS1 and H4 filament halogen bulb, can make it possible to switch the irradiation range, Low / High.

■ We achieved power-saving even high brightness!!

Low beam approx.1500lm · High beam approx.1900lm Power consumption is approx. 18W.

■ Target vehicle / Our simultaneous attachable parts

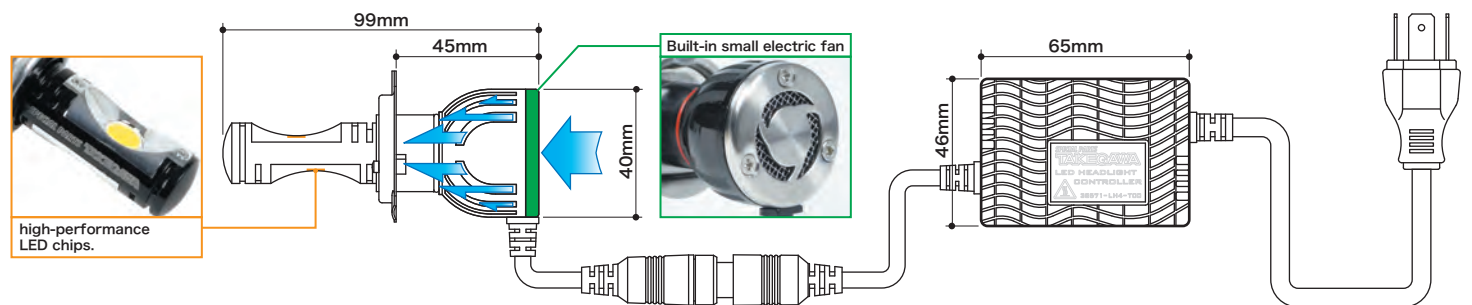

Target vehicle: Vehicle with HS1 or H4 headlight bulb.

※Some of AC lighting vehicle maybe light flickers slightly when idling and high beam.  
(AC lighting vehicle: It means vehicle which headlight does not turn on at key ON.)

Also, when mounting the LED bulb in the headlight unit, some vehicle needs some processing.

Our simultaneous attachable parts: Can be installed simultaneously our various meter, FI CON, our Headlight controller.
