

■ Super oil pump kit

**GROM/MSX125**

The discharge amount of the super oil pump compared to stock one, allows about 35% up.

By circulating large quantities of oil, it reduces the lubrication part load and improves the cooling performance.

In order to increase the strength of the pump itself, increased the thickness of the plate and increased the number of bolts for coupling the body and the plate.

※ R. Crankcase cover gasket is not included. It is necessary at the time of install, please purchase separately.

■ R. Crankcase cover gasket 00-02-0356

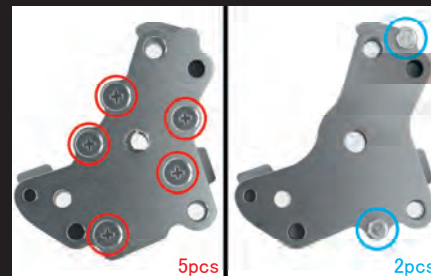

※Please be sure to use the knock pin of this kit.
