

■ Rear shock absorber (With vehicle height / preload adjustment function)

GROM/MSX 125

Rear shock absorber with emphasis on ride like at street riding or at long way riding. Damping force and spring rate is set to a mild than genuine one. With vehicle height adjustment function of moving amount 15mm.

Compare with genuine one: -5mm ~ +10mm Can be lowdown when set to -5mm.

Also by using our Lowdown front fork top bolt, it can be lowered about 10mm front fork length, you can enjoy a more lowdown style in combination with this product.

■ Oil damping system ■ Spring pre-load: stepless adjustment ■ Mounting pitch: 240mm ~ 255mm

■ Body: Chrome plating / Spring: Red ■ Adjust-wrenches are included.
