

## ■ Floating disc rotor

Z125 PRO

Can be used with a genuine front caliper.

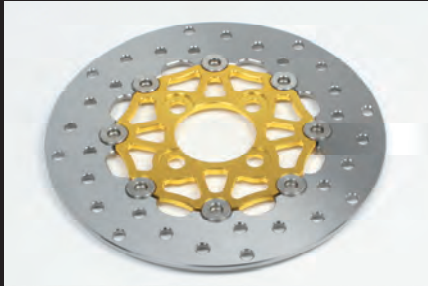

Minimizing the thermal deformation by disconnecting the disc rotor and the rotor hub portion, and can be maintained a stable brake performance.

Disc rotor part is adopted the durable stainless steel which is strong in rust.

Because our rotor hub part is made of aluminum alloy, it is lighter than the genuine one.

Rotor hub portion is champagne gold anodized.

※Only for genuine caliper.
