

■ Compact cool kit

Z125 PRO・KSR110・KSR PRO

Oil cooler kit for Z125 PRO, KSR110, KSR PRO for mounting under the cylinder head.

Corresponded to genuine cylinder head (or our Super head +R) and our Super head 4V + R. There are 2 types of the kit. There are two kinds of oil hose outlet which are our Special clutch cover or an oil filter adopter.

Adopted a compact cool (3 fin 4 oil line) with excellent cooling effect. It is possible to inhibit the oil temperature rise due to the large displacement of the engine. (Bore up kit for Z125 PRO are under development now.)

An oil cooler plate and an oil cooler guard are included as standard equipment.

For oil amount, please add 40cc.

Dry carbon color pipe kit (07-07-0011/ Option), can be dressed up by exchanging with standard aluminum color pipes.

****Kit for special clutch cover can not be installed simultaneously with third-party clutch cover.**
