

■ Stream line LED turn signal kit

LED turn signal that is adopted a compact and slim body.
 High quality and lightweight aluminum body are rubber-mounted and achieved both durability and vibration resistance.
 Stream-lined shape design that made the edges and innovative.
 The surface finishes with a mat black paint emphasizing a fearless image, our logo is also stamped.
 Built-in 5 high-intensity LEDs, visibility improves day or night.
 Moreover, by using LED, the power consumption can be reduced by about 1 W per lamp (at 12 V), compared with conventional bulbs. Front position lamp can be lit up same as stock.
 Kit includes a wide range flasher relay required for attaching the LED turn signal.

※Because of the difference of the shape, MSX125 / MSX125SF (Thailand model) can not be installed.
