

■ Tracker exhaust system

GROM('16 model)

It is a short type exhaust system as Dirt Tracker style.

As we are committing custom looks, the silencer end is adopting a billet aluminum end dish.

By adopting a special structure to inside, reduce the volume increase due to aging.

Exhaust pipe is made of the stainless steel with excellent corrosion resistance.

Surface is polished and finished beautifully.

Silencer is made of aluminum, available in two types, silver anodized and black painted.

■ Proximity noise 81dB (A)

※Also, can be installed to MSX125 SF.

※Cannot be installed to GROM(JC61-100001 ~ 129999)/MSX125(MLHJC618_D500001 ~)
