

■ LED tail lamp kit (Smoke lens)

GROM · MSX125 · MSX125SF

By simply replace with stock, can be changed the lighting image of LED tail lamp.

By changing the color of the lens as well as the shape of inner reflector changed from the stock, it is possible to refine the image of the rear view.

Moreover, by adopting contemporary lighting image and smoke lens, can be produced the rear area beautifully.

※Disassembling work of the tail cowl is necessary for installation.
