

## Tracker exhaust system

Z125 PRO

It is a short type exhaust system as Dirt Tracker style.

By installing it, the exhaust efficiency improves, and it will be possible to increase the output at the mid rpm to high rpm range.

As we are committing custom looks, the silencer end is adopting a billet aluminum end dish.

By adopting a special structure to inside, reduce the volume increase due to aging.

Exhaust pipe is made of the stainless steel with excellent corrosion resistance.

Surface is polished and finished beautifully.

Two type of aluminum silencer available such as "Silver" with silver anodized, and "Black" black body with black anodized to the muffler end.

Proximity noise 83dB (A)

※When installing this, it is necessary to cut a part of side cover.
