

## ■ Wide range turn signal relay (3 pin - tick sound type)

**Universal parts(DC12V)**

When changing turn signal to an LED, etc., it may not be blinking as a genuine turn signal relay, or it may become a high flasher speed. By replacing this product with a genuine turn signal relay, you can operate with the normal speed of blinks.

According to the blinking, the "tick tick" sound gives a clear operating sound.

Those who do not need operation sound, please use [05-08-0083](#) wide range flasher relay (2 pin type) which we have been selling currently.

※ Cannot be used with AC 12 V of battery-less vehicles.

※ There is no compatibility with relays with alternating lighting front and rear or with relay with position lamp function.

※ Our existing products [05-08-0083](#) Wide range flasher relay (2 pin type) is pin arrangement are different.

Also, you need to connect the ground earth to the frame.

※ Because of a universal parts, wiring may be necessary for installation, and depending on the structure of the vehicle or circuit system of turn signal, it may not work with this parts.
