

Hyper LED turn signal bulb kit

Super Cub50(AA04)
Super Cub110(JA10)-CROSS CUB(JA10)

It is an LED turn signal bulb kit that can be attached to the genuine turn signal of Super Cub 50 (AA 04), Super Cub 110 (JA 10), Cross Cub (JA 10). It comes with conversion wire harness for wide range flasher relay, there is no need to modify the stock wiring, it can be installed easily. Same as the genuine turn signal relay, this wide range flasher relay (3 pin type) has operation sound synchronized with blinking. By using this wide range flasher relay, you can turn on the turn signal LED without using unnecessary resistance etc. Also, by changed the turn signal bulb into an LED, the power consumption at the time of lighting can be drastically reduced, and it will result in good light response specific to LED

- ※ This kit dedicated to the genuine turn signal for specified model only.
Can not be used for our custom "round M" and "round S" type turn signal kit. (The shape of the LED bulb base is different.)
- ※ Super Cub 50 type AA04 can not be used.
- ※ Only used with Super Cub 110 type JA10.
