

High speed pulley Kit

NMAX125

NMAX125 High Speed Pulley Kit, introducing new High-Speed Pulley Kit enables maximum speed up by only replace to a stock pulley.

By installing this high speed pulley optimized pulley design and the attached weight rollers (8.5 g × 6 pieces) on the stock NMAX , the maximum speed up can be achieved while keep stable power output.

Supplied weight rollers: 8.5g × 6 pieces (for stock NMAX engine)

With laser Takegawa logo mark.

※Using special tool, universal holder (our part number: 00-01-1001) is required for installation.

※The attached weight rollers (8.5 × 6 pieces) matched and perform with the stock engine and stock exhaust muffler specification.

If you replace exhaust system or any other modification on your engine, you will need to re-set the weight rollers.
