

■Hyper Ignition Coil For CYGNUS-X(SE12J / SE44J)

Our "Hyper Ignition Coil" increases discharge voltage for better combustion efficiency. This improves engine power output and fuel-efficiency. Discharge voltage decreases when engine rotation is higher. Using stock ignition coils can be a cause of accidental fires if the plug cord or the spark plug have deteriorated and can't produce the required voltage. The "Hyper Ignition Coil" makes a stable discharge voltage possible, and is recommended for custom engines.

Name	Hyper Ignition Coil
Applicable model	CYGNUS-X (FI model) :SE44J
Item number	05-02-0014

Name	Hyper Ignition Coil
Applicable model	CYGNUS-X (Carburetor model) :SE12J
Item number	05-02-0016
