

## **Tail Lamp Kit Instruction Manual**

Item No. : 0 9 0 3 0 8 8 8 Cat's-Eye Type (Red lens) : 0 9 0 3 0 8 8 9 Cat's-Eye Type (Clear lens) Fitting models & frame nos: Ape50 : AC16-1000001 ~ Motorcycles equipped with Fenderless Kit of 09-09-200 Ape50 : AC16-1600001 ~ Motorcycles equipped with Fenderless Kit of 09-09-2007 Ape100 : HC07-1000001 ~ Motorcycles equipped with Fenderless Kit of 09-09-2004

Thank you for purchasing one of our products. You are requested to follow the below-mentioned instructions in installing this Kit.

• Before installation, please check the contents of this Kit. Should you have any questions about the products, please kindly contact your local dealer. • This is a Kit to change a tail light to our TAKEGAWA's from the stock one installed on the above-mentioned fitting models.

• This Kit is for use only in 12V motorcycles.

Please note that the descriptions in this manual like illustrations and photos may vary from the actual hardware.

## Please read the following instructions before installation

We do not take any responsibility for any accident or damage whatsoever arising from the use of this product not in conformity with the instructions in this manual.

We shall be held free from any responsibility or compensation whatsoever for any glitch in the parts other than ours if the glitch takes place after the installation and use of this product.

If you make alterations to the Kit, we shall be held free from any guarantee of this product.

You are kindly requested not to contact us about the combination of our products with other manufacturers'.

If water gets into the wiring connector or socket, there is a possibility of a short circuit. When driving in the rain or washing your motorcycle, please take care not to let the water in the wiring. If water got into the wiring, remove the lens and wipe off the moisture inside.

Please do the work of changing the bulbs only when it is cool; otherwise, you will get burned from the heated bulb.

Never install this product at the place where heat is generated or where there is severe jolting, for the bulb may be deformed from heat or broken from vibration.

Never use gasoline or thinner for cleaning the product. There is a possibility of the product deforming.

Always change the bulb with that of 12V10/5W. If a bulb of over 10W is used for long hours, the lens and case may deform.

Stop and Tail Bulb (Red) Product No.: 09-03-0106

Stop and Tail Bulb (Clear) Product No.: 09-03-020

In case you install this product, please use this as an auxiliary light like a tail or a license light.

CAUTION The following show the envisioned possibility of injuries to human bodies or property damages as a result of disregarding the following cautions

• Work only when the engine and a muffler are cool. (Otherwise, you will get burned.)

Prepare right tools for the work. (Otherwise, the installation with improper tools could cause breakage of parts or injuries to you.)

· As some products and frames have sharp edges or protruding portions, please work with your hands protected.

- (Otherwise, you will suffer injuries.)
- Before riding, always check every hardware for slack in parts like screws. If you find slack ones, screw them securely up to the specified torque. (Or else, improper torque may cause parts to come off.)
- Be sure to use the supplied red bulb when the clear lens of 09-03-0889 is used. Besides, when changing bulbs, please use a 12V10/5W red bulb, and scrape away a portion on the red surface so the bulb shines bright and clear on the license plate.
- When a Cat's-Eye Type clear lens of 09-03-0889 is used, be sure to install a Reflector Kit of 09-03-840 available as an optional extra.

WARNING The following show the envisioned possibility of human death or serious injuries to human bodies as a result of disregarding the following warnings.

- $\boldsymbol{\cdot}$  Always drive the engine in a well-ventilated place, and do not start the engine in an airtight place.
- (Otherwise, you will suffer from carbon monoxide poisoning.)
- When you notice something unusual with your motorcycle while riding, immediately stop riding and park your motorcycle in a safe place. (Otherwise, the abnormality could lead to accidents.)
- $\boldsymbol{\cdot}$  Before starting the work, secure your motorcycle firmly on level ground for safety's sake.
- (Otherwise, your motorcycle could overturn and injure you while you are working.)
- If you find damaged parts when checking or performing maintenance of your motorcycle, do not use these parts any longer, and replace them with new ones. (The continued use of these damaged parts as they are could lead to accidents.)

Please be informed that specifications, design, and prices are subject to change without prior notice. This manual should be retained for future reference.

Those items marked with are already attached to the tail light COMP.

Please order repair parts with the Repair Part Item No.

Without the repair part item No., we may not be able to provide the correct parts.

Some parts are only available as a set. Please order them with the set number.

~ Installation Procedures ~

- 1 . Remove a stock tail light. At this point, see how the wires are run for the tail and brake lights.
- 2 .Install the tail light COMP. of No.1 onto the stay of No. 5 with flat head bolts of No.2, spring washers of No.3 and hex nuts of No.4. See the Fig.A

A Caution: Apply the specified torque. Flat head bolt : 10 N·m (1.0 kgf·m)

3 Install the tail light which you have just assembled in the step 2. above to the vehicle body with hex flange bolts of No.6 and hex flange nuts of No.7 above.

$\Delta$ Caution: Apply the specified torque.	
Hex flange bolt : 12 N• m (1.2 kgf• m)	

4 . Do the wiring.

	Tail light	Connect to		
(-) Ground wire	Yellow	Green		
Tail light	Black	Yellow		
Brake light	Red	Green / Yellow		

In the case of installing onto the Ape50 with frame nos AC16-1600001 onwards:

After fixing a supplied tail light sub-harness onto the frame, do the wiring referring to the above chart.

5 . Then, start the engine in a well-ventilated place, and check that the tail and brake lights work properly. In case you detect some malfunction, please check bulb and wiring

for the blowout and connection respectively, which may be considered to be the cause for the malfunction.

 $\Delta$  Warning : Always drive the engine in a well-ventilated place.
